

An introduction to the

Parish Giving Scheme

How it works:

On the **1st of the month** the donor donates a chosen amount by Direct Debit via the Parish Giving Scheme, for this example let's say it is a £20 monthly donation.

On the **3rd of the month** the donation arrives in the Parish Giving Scheme account.

giftaid it

Just one day later on the **4th of the month**, the Parish Giving Scheme will claim for any eligible Gift Aid (25% of the amount donated at no extra cost to you! So in the example above, your £20 donation could claim a further £5 via Gift Aid for the cathedral).

Fast-forward to the **10th of the month**, the Gift Aid claim has been approved and the cathedral receives your donation PLUS the reclaimed Gift Aid (so in this case a £25 donation).

Over a year, if you are paying £20 per month into the Parish Giving Scheme (so £240 per year), we could be able to claim a further £60 in Gift Aid, taking your total giving up to £300 at no extra cost to you!
